

# Why Veranda?

## CONSTRUCTION

Veranda Luxury Pontoon uses the finest quality aluminum for each pontoon boat deck we build, ensuring a lifetime of trouble free fun. All aluminum is a great way to say, NO WOOD and NO ROT. Veranda's patented 2x6 extruded aluminum planks are interlocked and welded directly to brackets creating a solid foundation that eliminates flex and noise. We believe that our All-Aluminum All-Welded Interlocking Deck System is superior to all other pontoon manufacturers in the industry and offers you a lifetime guarantee on the decking.

## COMFORT

At Veranda Luxury Pontoon, your personal comfort is at the forefront of every decision we make. Our V One, VP and Vertex Series each include a long impressive list of best-in-class standard features. We have intentionally gathered specific groupings of amenities into Base, Deluxe and Luxury Packages available on our Relax and Fish Series, which make your buying process easy and get you out of the dealership and onto the water faster. We also offer a robust list of optional features on all models to suit your specific need. Your passengers will never want to return to land once they've experience the deep comfort on your Veranda!

## VALUE

With Veranda, you'll experience the elegance, beauty and confidence of knowing you have chosen the finest deck system in the industry with exquisite best-in-class components, durable marine grade vinyl, polyurethane foam seating, and the reliability of Yamaha Outboards. We guarantee our decks and seating to be wood-free, so the worries of your substructure rotting is a non-issue. Veranda owners never have to choose between exhilarating performance and soothing relaxation. Your Veranda will generate decades of memories.

## PERFORMANCE

Allow us the pleasure of totally redefining what pontoon performance means. Every single model that rolls off the assembly line at Veranda Luxury Pontoon comes standard with a tri-toon Performance Package, which includes hydraulic tilt steering, full-length lifting strakes and our integrated performance motor pod. The trio of components provides exceptional performance including greater capacity, increased horsepower capability, increased lift, less resistance, better maneuverability, and higher overall speed.

## ENJOYMENT

Your satisfaction is our pursuit and whether that means tubing behind the tower on a VP RCT, throwing a topwater bait in the early morning from a Fishing Series, or cruising in our flagship, the V One, Veranda Luxury Pontoon has you covered. Perhaps your idea of an afternoon out on the water means beaching your Relax Series pontoon on a remote shore, cranking up some tunes, and basking in the sun - well, you can do that as well. Add a ski tow bar or turbo swing tow bar and keep your watersport enthusiasts happy. We provide a vast selection of optional features to meet your taste and budget.

## SQUARE FOOTAGE

Some pontoon manufacturers round up the length of their boats to a nice, even number which can be very misleading for a consumer. At Veranda, you truly get what you pay for! The deck length listed on each model (20, 22 or 25 feet) is accurate. The overall length includes the deck length, plus the motor pod extending from the stern, but not the outboard. Our floor plans are designed to provide the maximum square footage of truly usable deck space. Our Authorized Dealers will gladly help you determine the perfect series, model and size luxury pontoon to ensure you have a lifetime of enjoyment!
