

## VITAL INFORMATION TO READ:

When choosing a luxury pontoon, the information contained on these two pages will be the most valuable intel you can arm yourself with while comparing brands. This is our commitment and your assurance you will not find a finer built foundation to build your luxury pontoon on, anywhere. Although our competitors will tell you a multitude of Myths, we want you to know the Facts.

# THE VERANDA LUXURY PONTOON DIFFERENCE

### PATENTED: ALL-ALUMINUM DECK...

All aluminum is a great way to say, NO WOOD and NO ROT. Veranda Luxury Pontoons uses the finest quality aluminum to produce each pontoon boat deck ensuring a lifetime of trouble free fun.

### PATENTED: ALL-WELDED INTERLOCKING DECK

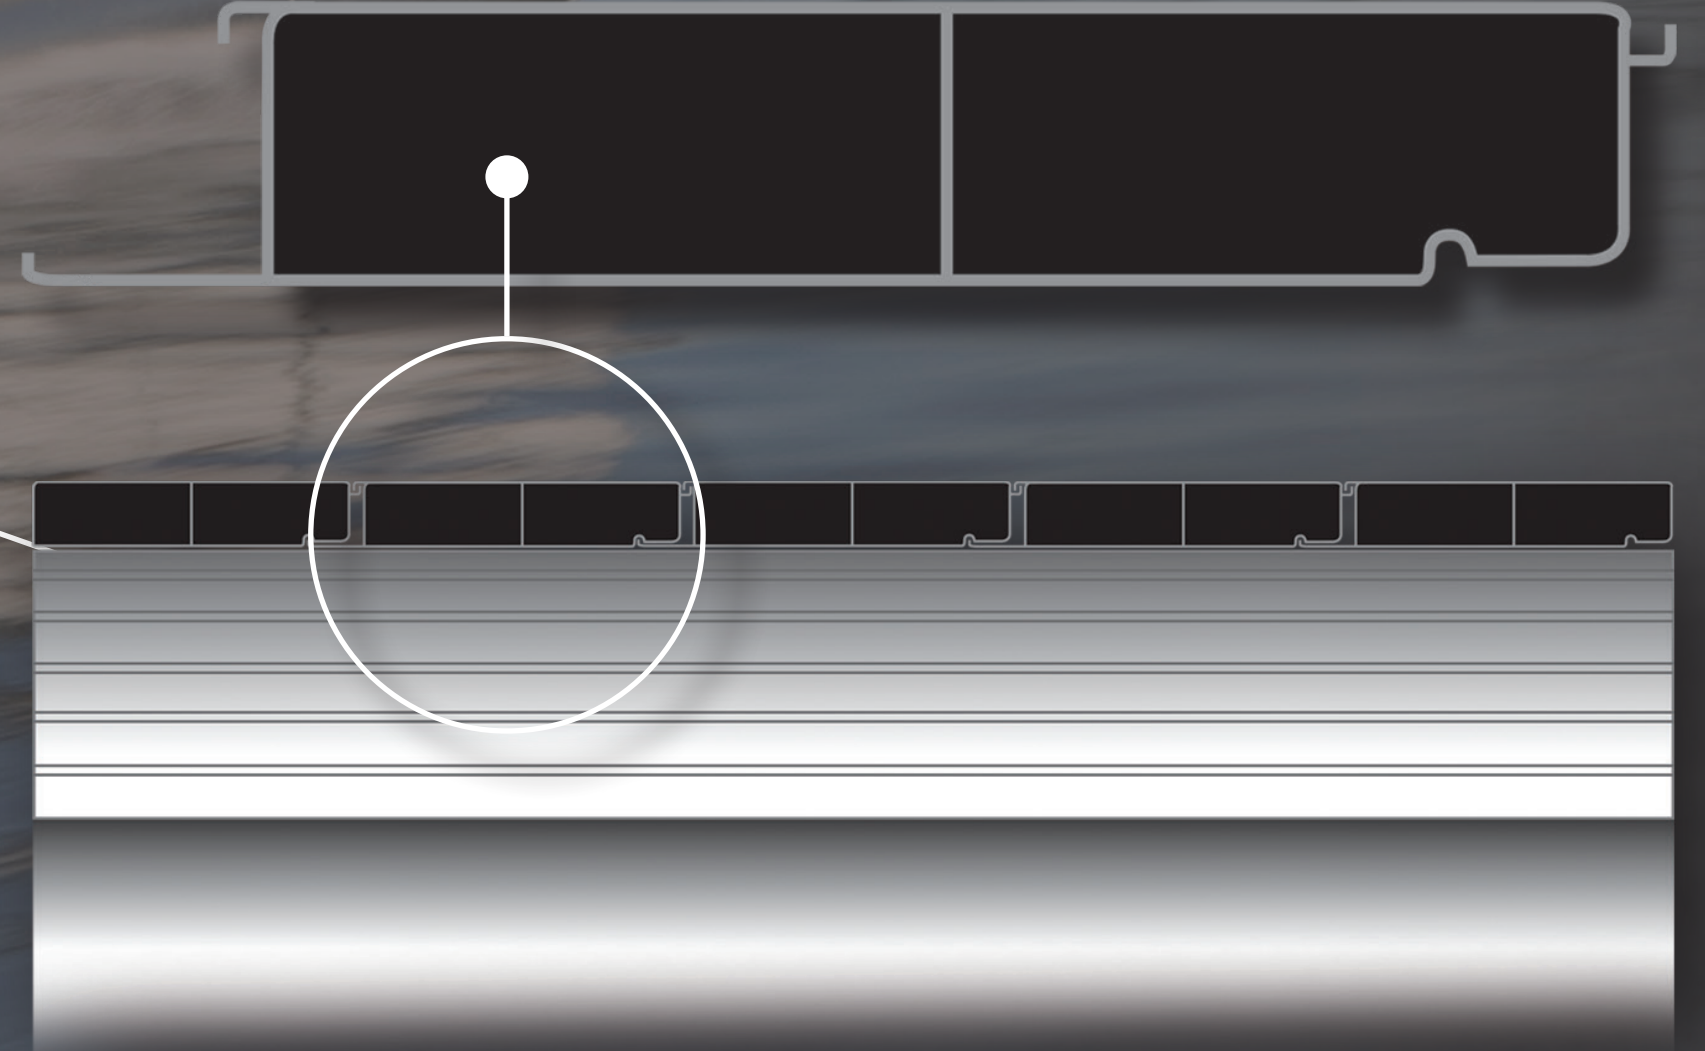

Each 2x6 plank is engineered to interlock together. After the planks are interlocked, they are welded directly to brackets that run the full length of each pontoon. This unitary construction creates a solid foundation that eliminates flex and noise often seen on the competition's screw together decks.

### PATENTED: EXTRUDED ALUMINUM PLANK

Veranda's patented aluminum planks are extruded, creating hollow chambers inside. These chambers reduce weight and allow for aeration of the deck surface keeping it cool during the hot summer months. The competition's wood deck can hold moisture and increase in weight over time.

## PATENTED INTERLOCKING DECK LIFETIME STRUCTURAL WARRANTY

By choosing Veranda you will avoid the costly maintenance required by wood deck systems, retain long-term value and subsequently a greater return on your investment.

### PATENTED ALL-ALUMINUM DECK MOUNTING SURFACE

Veranda Luxury Pontoons aluminum structure provides a durable foundation for installation of railing, seats, and other components. Fasteners attached to the competition's wood structure decking are more likely to break away or loosen over time.

### CHAMBERED PRESSURE TESTED PONTOONS ENCLOSED M-DECK BRACKETS

Veranda's pontoons are large in diameter and designed to provide maximum flotation. Each pontoon has up to five structural baffles to provide added strength and rigidity. The m-deck brackets, which attach the pontoon to the decking, are capped and welded over to provide superior support and strength, eliminating stress caused by today's large outboard engines.

# THE MYTHS & THE FACTS

WHAT THE COMPETITION DOES NOT WANT YOU TO KNOW!

MYTHS crafted by anxious, worried, and troubled competitors of Veranda Luxury Pontoons

### MYTH #1

Troubled competitors want you to believe *Veranda Luxury Pontoons ride rough.*

#### FACT

TRUTH IS, unlike competitor's decks obstructed by cross member construction, the Patented All-Aluminum All-Welded Interlocking Deck System on each and every Veranda Luxury Pontoon is engineered and constructed with a smooth underside, free and clear of these obstructions. This smooth surface reduces water drag and eliminates all surging which can result from cross members. Troubled competition tries to achieve this feature by offering an optional, riveted skin of aluminum on the bottom of their cross members; skin which can trap moisture and actually accelerate wood rot.

### MYTH #2

Worried competitors want you to believe *Veranda Luxury Pontoons are noisy.*

#### FACT

TRUTH IS, pretty much nothing could be further from the truth! Our luxury pontoons do not include any wood, screws, or cross members. Veranda Luxury Pontoons Patented All-Aluminum All-Welded Interlocking Deck System, engineered and constructed without screws and cross members, actually eliminates the very noise our worried competitors knowingly create by their own use of wood, screws, and cross members.

### MYTH #3

Anxious competitors want you to believe *the deck on Veranda Luxury Pontoons get hotter than theirs.*

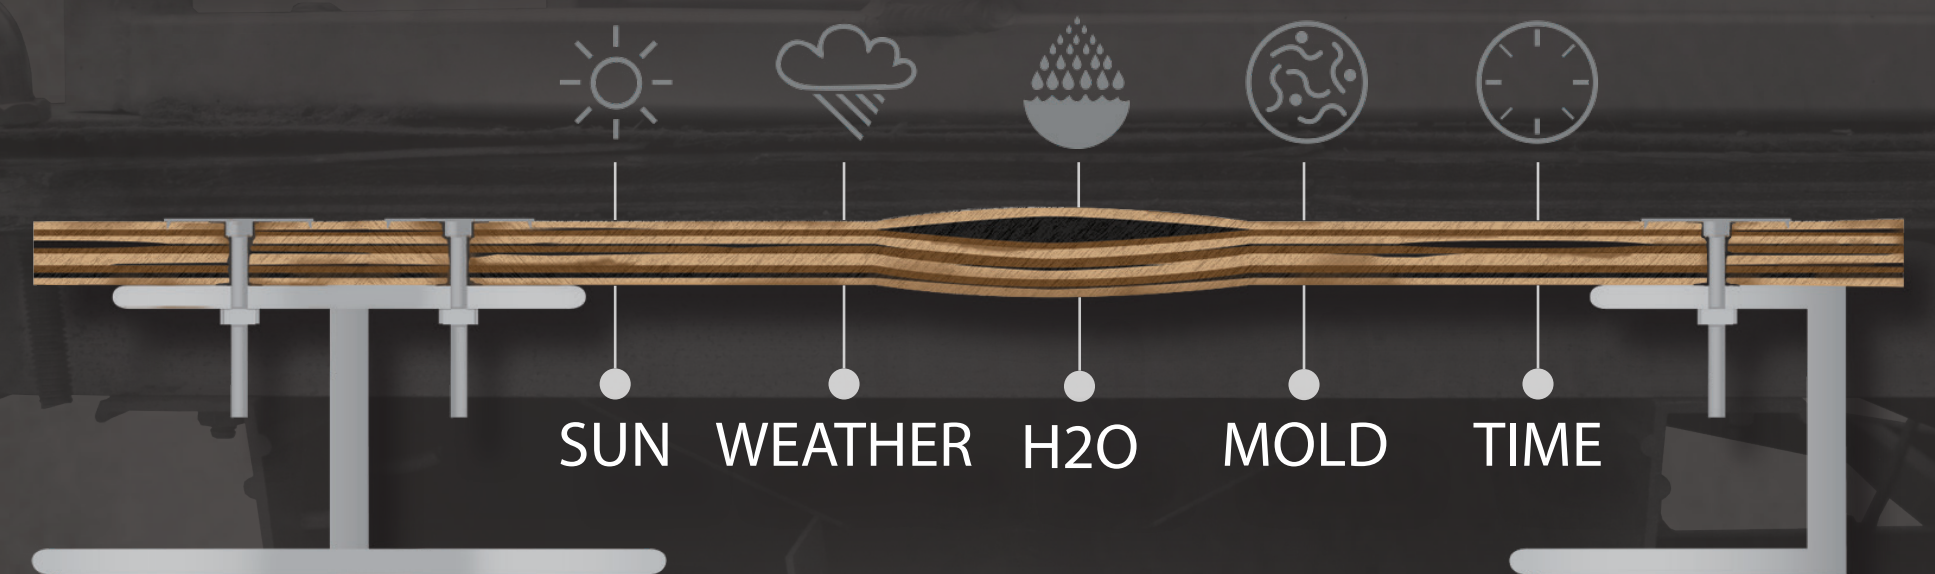

#### FACT

TRUTH IS, the wood decks built by our anxious competitors can absorb moisture and actually rot. Veranda Luxury Pontoon decks are engineered and constructed with extruded all-aluminum planks, which allow for movement of air and actually work to cool our Patented All-Aluminum All-Welded Interlocking Deck System. In fact, we recently did a test comparing deck temperatures between one of our Veranda Luxury Pontoons and a competitor's deck with similar colored vinyl flooring. The results may startle you...temperatures on our deck were over 15° cooler than our competitors decks. Which would you rather walk bare foot across? This evidence is further reason to trust Veranda Luxury Pontoons construction techniques.

## THE COMPETITORS DECK VERSUS VERANDA LUXURY PONTOONS DECK:

WOOD DECK SYSTEM VS. THE PATENTED ALL-ALUMINUM INTERLOCKING DECK SYSTEM

Compared to our Competitors "Predetermined Obsolescence" use of wood, Veranda's no-wood "Lifetime of Enjoyment" construction featuring our Patented All-Aluminum All-Welded Interlocking Deck System clearly illustrates that Veranda Luxury Pontoons is the best choice! At the time of purchase, all of our competitors plywood decks are void of moisture, rot, or mold. However, over time this substrate deteriorates, absorbs countless gallons of water, begins the rotting process, separates and begins to mold. As illustrated, a bigger bolt through plywood does not constitute a stronger foundation, it just puts a bigger hole in a porous substrate. Don't you deserve the assurance that you are purchasing the best for your investment?

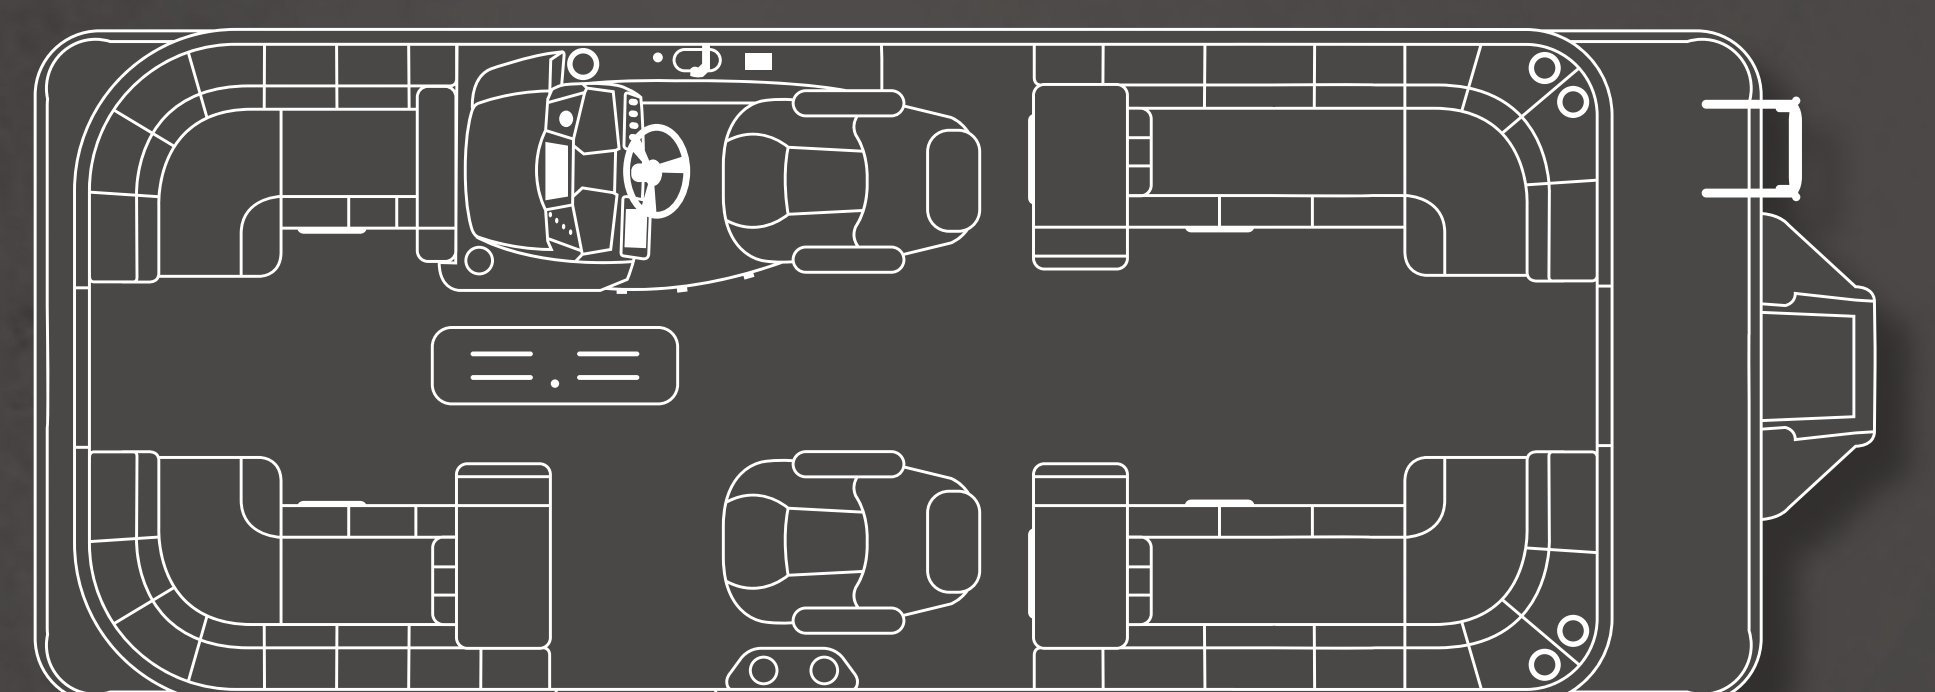

- PLYWOOD SURFACE OFFERS WEAK MOUNTING SURFACE
- MORE BOLTS, MORE ACCESS FOR MOISTURE
- PROTRUDING CROSS MEMBERS INCREASE DRAG
- DECREASED STABILITY OVERTIME

- INCREASED WEIGHT
- INCREASED PROBABILITY OF MOLD GROWTH
- INCREASED NOISE
- M BRACKETS ARE LEFT OPEN

NO WOOD, NO ROT & NO MOLD = LIFETIME OF ENJOYMENT

### NOT ALL BOAT SIZES ARE EQUAL

The goal of each floorplan we offer is to provide you, our valued customer, with the perfect combination of swim platforms and plentiful seating and storage. The average Veranda Luxury Pontoon interior is over 10% larger than most all other brands.
